

## Waitlists

Replies centered on the following options:

- Limit waitlists based upon the total number of units. For example, if they are registered for 6 units, they can place themselves on waitlists up to 12 units – cap of 18
- Some schools did something very similar but used number of sections instead of units.
- A student can place themselves on as many waitlists as they choose, however, once they have successfully registered for 12 units, all of the waitlist sections are removed.
- A student who is registered for a course (e.g. PSYC 101) can only place themselves on one waitlist for the same course (e.g. PSYC 101).
